

# Database & Web Tutorial 2

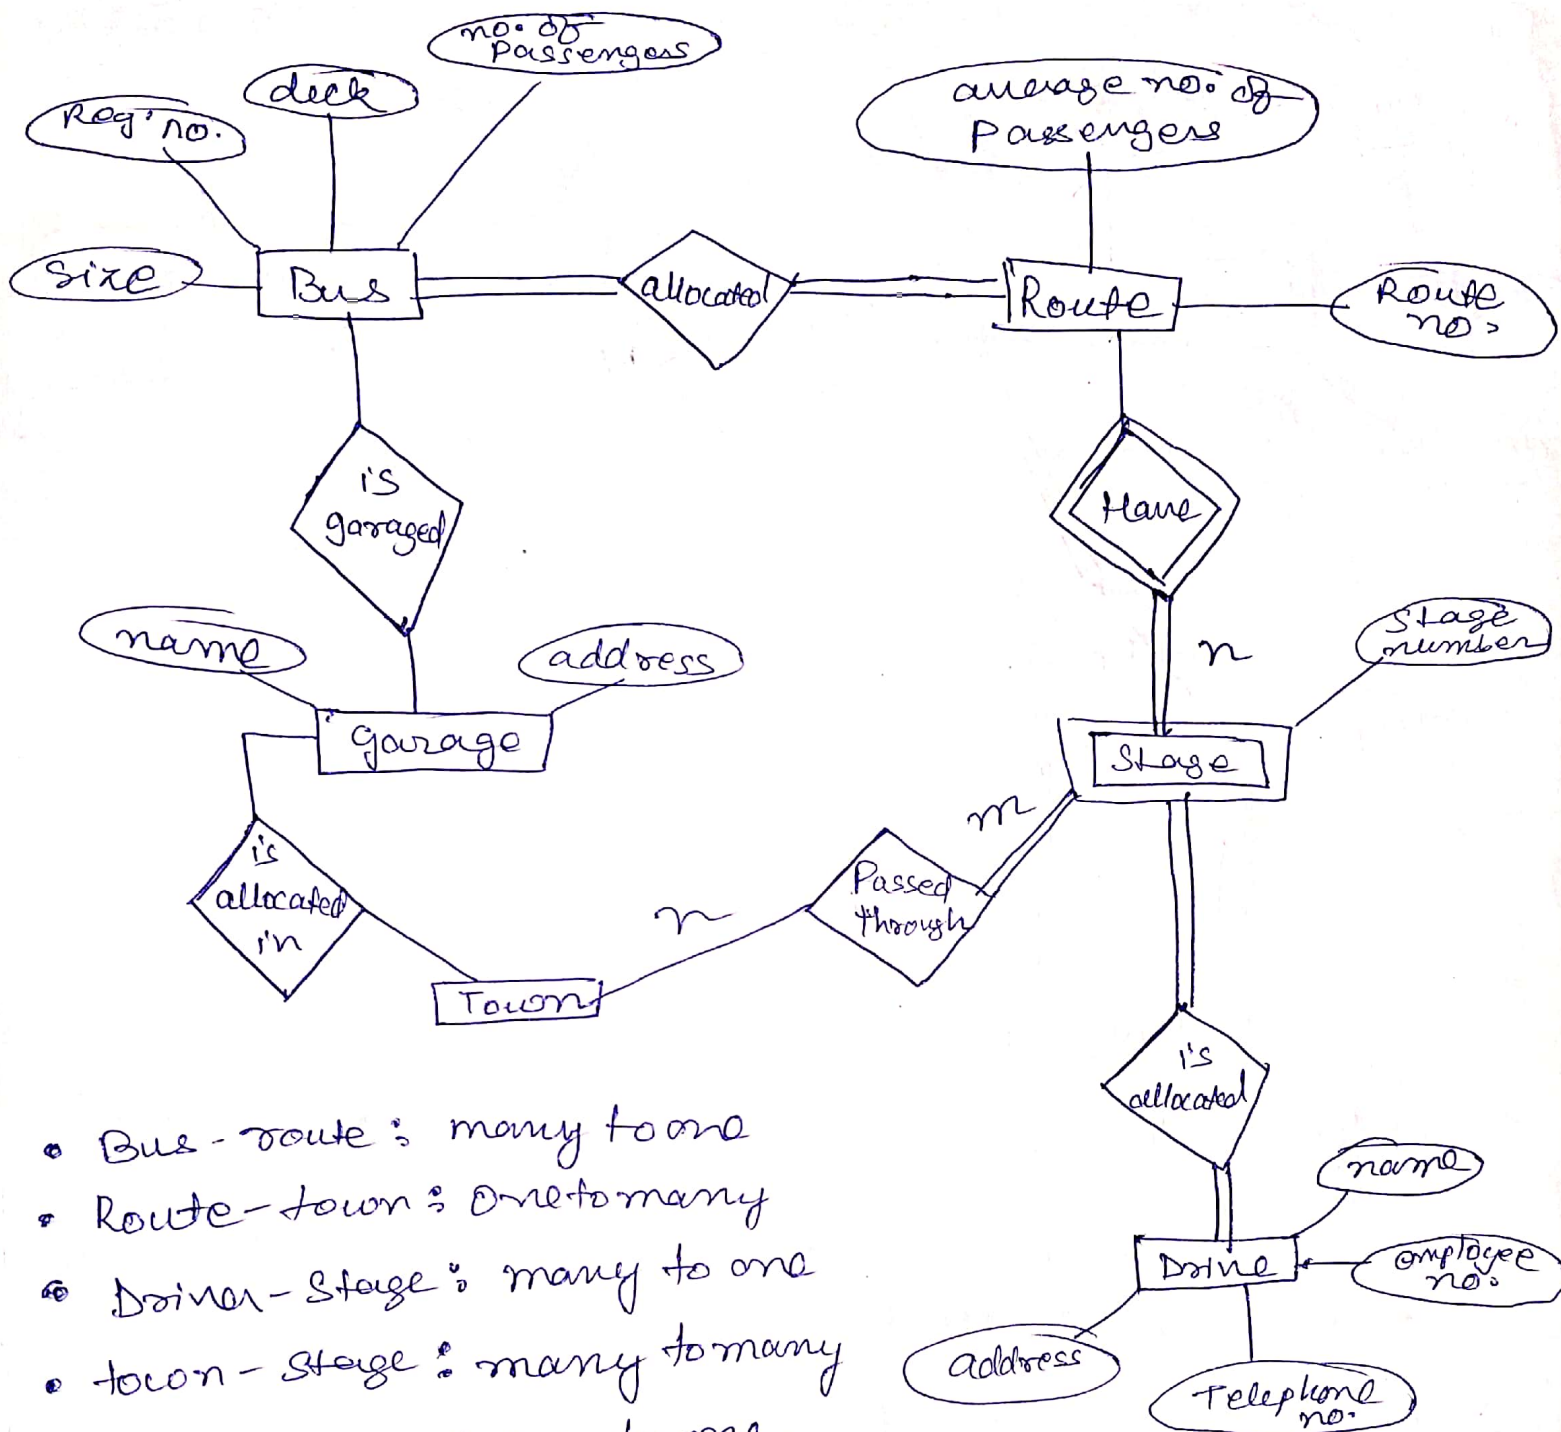

a) Destination because it may contain street, city, state, pincode.

It can be destination, address and date so there are three composite attributes

b) No. of Days derived from shipment date & delivery date (single derived attribute)

c)

- Bus - route : many to one
- Route - town : one to many
- Driver - Stage : many to one
- town - stage : many to many
- town - garage : one to one.
